Welcome Message

Welcome to the APEX Symposium 2012! This year APEX is staying “Ahead of the Curve” by exploring leadership both as it is practiced currently, and how it could be practiced, given an environment which is changing constantly, changing at a faster rate, and changing in ways which are different from the past.

To assist us in this exploration, we have assembled a group of remarkable leaders, who will guide us through the two days. They will share their views on traditional models of leadership, challenge a few stereotypes, and give us a glimpse into how we can look ahead to better anticipate and react to new situations.

To ensure that we benefit from a wide range of viewpoints, we will hear from exceptional individuals from inside the federal public service, and from the worlds of academia, for profit, and not-for-profit enterprises, as well as internationally recognized Canadians, who have their own unique perspectives. Being “ahead of the curve” should be a collective goal and we will hear some thoughts about how we can achieve that.

But innovative thinking does not only come from outside. Haven’t you wanted to get out of your office and talk to people? Here is your chance. You are part of an impressive representation of the federal public service that is gathered in one place for two days – we recommend you use it to connect, network, renew friendships, and make new ones. Discuss your challenges and share your innovative solutions. At the very least, promise to stay in touch with one or two new colleagues.

On behalf of APEX, thank you to all of the contributors to this year’s program, including our distinguished guest speakers and discussion participants.

Please accept this two-day opportunity to learn, connect, grow, and celebrate our many achievements as leaders in the Public Service of Canada. We look forward to meeting as many of you as possible on May 29-30 in Ottawa.

In physics, art and nature, the curve is a powerful image, and the notion of staying «ahead of the curve» resonates with statisticians, designers, jet fighter pilots and many others. What can it mean for us, as federal public servants? How can it help us achieve our personal objectives and better serve Canadians? Let’s find out together as we explore the intersection of change, innovation and leadership.

Dr. Peter Jensen

Authority on Coaching Leadership and Personal High Performance
and Instructor at the Queen's School of Business

As a trainer for many of Canada's Olympic athletes and a coach to many private and public sector executives, Dr. Peter Jensen knows what it takes to tap into a person's talent. He will share his insights on what today's leaders need to bring to the workplace to create an environment where people feel energized, have a sense of purpose and feel supported in reaching their full potential. In his words, "Imagery is the language of performance." Dr. Jensen will share with us his views on how effective leaders play important developmental roles and, drawing on his experience, leave us with images of how we can move our teams to higher performance.

WRANGLING THE FUTURE: STRATEGIC FORESIGHT AND COMPETITIVE INTELLIGENCE

NAC THEATRE

uOttawa

As we face a rapidly changing environment, we need to find new economic, social and scientific models. As leaders in the Public Service of Canada, we are bombarded with information from a variety of media. How do we sort the useful from the extraneous?

In recent years, an increasing number of organizations have been turning to *Strategic foresight and competitive intelligence* models to identify a range of 'plausible futures'. Sound... *implausible*?

Think again! APEX gathers an impressive group of thinkers and practitioners who share with us secrets of 'predicting the unpredictable'.

A RESPECTFUL AND PRODUCTIVE WORKPLACE

NAC THEATRE

The health and well-being of Executives and the people they lead is becoming an increasingly critical issue within the federal public service as well as for other OECD countries and in the private sector. There has been extensive research that shows a lack of respect can have an impact on the health of employees and ultimately the productivity of an organization. So, as leaders, how do we create respectful, healthy and productive organizations that support employees in achieving results for Canadians? A panel of experts from the private sector, academia and the federal public service will provide their insights and offer practical solutions for our consideration.

Moderator

Catherine MacQuarrie
Assistant Secretary to the Cabinet, Public Service Renewal, Privy Council Office

Co-chair

Daniel Jean
Deputy Minister, Canadian Heritage
